

# MERSEN RELEASES FISCHERLINK™ 2.0

## ULTRA LOW INDUCTANCE CAPACITOR -BUSBAR CONNECTION

### FISCHERLINK 2.0

- Optimized compact design bringing together FTCAP capacitors laser-welded on high temperature MHi-T™ series laminated busbar

#### Increased capacitance density

- up to 20 % more capacitance in the same volume

#### Minimal inductance

- extremely low inductance < 9 nH through compact designs

#### Easy to install, easy maintenance

- Assembled and tested 100 % before delivery, there are no additional installation costs.
  - Capacitors and busbars packaged together under one part number offer additional savings in administrative costs.

FTCAP and Leclanché Capacitors belong to the Mersen Group
